

# Geography Trip

On the 16 of March our class went on a geography trip with our 2 teachers Mr. Dwyer and Mr. Barron. We went to Woodstock which is in Inistioge. We went to see all the lakes and rivers and waterfalls. We got on a bus on Friday at 9 o'clock in the morning. We had to bring wellies so when we got there we put them on. We got off the bus and started walking a bit. The first thing we saw was the waterfall and all of its features there was a bridge above it so we got on it and started taking pictures. We then walked up a bit of a hill and we saw an old wall where someone probably lived there a long time ago. We then walked back down the hill and started walking again. We were walking for a while and we ran into Jacobs grandfather and his 2 dogs after that we kept on walking. Soon we sat on some benches and started getting something to eat. There was a playground beside it and a lot of us went over to it to see what was there. After a while then we started walking again and the teachers took a picture of our class and in the background you could see a bridge which was in the village of Inistioge. We started walking again and we got back on the bus again. The bus brought us down to the village and we went into the shop to get food. There were tables and chairs there so we sat on them. In about 15 minutes we got back on the bus and we headed back to school. We got back at about 1.30pm. The most unfortunate thing was that we got back for our history test but overall it was a good day.
